

FA/IoT Conference & Business matching (BRNO)

On the occasion of the most important engineering fairs in CEE - MSV Brno - Japanese External Trade organization JETRO organizes the delegation of factory automation, IoT and machinery production companies from Japan. In order to promote their business development in Czech Republic and other CEE countries, the delegates will make presentations and participate in networking events. JETRO kindly invites IT vendors, system integrators and other interested parties to visit the conference and take this opportunity to expand their network with Japanese companies.
