

Copernicus & Galileo: How to build applications using satellite data (webinar)

Dates: Thursday, 4. June 2020

Organizer: SARIO

Contact: diverzifikacia@sario.sk [1]

[Copernicus](#) [2] and [Galileo](#) [3] are Earth observation and satellite navigation programmes of the EU. Forming the key part of the European space activities, they provide a valuable source of data and services that are used to build a vast number of useful applications.

The aim of this webinar is to introduce possibilities of using these sources of data as well as successful Slovak projects in this field to software companies and startups. The discussion will also cover prestigious European competitions [Galileo Masters](#) [4] and [Copernicus Masters](#) [5] which will be presented directly by their German organizer AZO.

The webinar will be conducted in English.

Speakers:

Jakub Kapuš – Spacemanic s.r.o., Slovak Organisation for Space Activities

Matúš Bakoň – insar.sk s.r.o.

Peter Pastorek – Ministry of Environment of the Slovak Republic

Monika Mayr – AZO

Registration is open until **3rd June, 2020**. The link (Zoom application) will be sent to the registered participants on the day of the webinar.

REGISTRATION

[6]

The [Galileo Masters](#) [4] and [Copernicus Masters](#) [5] annually awards prizes to the best services, products, and business concepts that use satellite navigation and Earth observation data in everyday life, spurring the development of respective market-driven applications. Open for submissions until 30 June 2020, the competition awards prizes to innovative solutions at each development stage, with the objective of turning them into real businesses. With more than EUR 1 million worth of prizes, there is an opportunity for great minds to boost their business with satellite data.

SARIO as a Galileo Masters & Copernicus Masters Regional Associate 2020 is proud to support the awarding of innovative solutions, developments and ideas that use satellite navigation and Earth observation data to tackle challenges faced by business and society.
