

Territories

SARIO regularly prepares a summary of the updated economic information of the selected States and the world.

Basic information on the territory contains data on trends and prospects for the economy, the conditions for entrepreneurship, statistics of foreign trade, export and investment opportunities, legislative standards for foreign trade, as here you will find useful Internet links, indexes and databases.

Recommended sources of information about foreign markets are also:

Tool of the European Commission, which concentrates all of the currently available information on the conditions for access to markets for exports and [Market Access DataBase](#) [1] and an instructional video in multiple languages.
