

Electronics & Electrical Components Industry

The Electronics & Electrical Components Industry (EECI) can be considered as one of the main pillars of Slovak economy. Current situation on the market reflects both — traditional electronics manufacturing (power generators, telephones, radios, etc.) and new trends especially connected to the growing automotive industry in Slovakia (electric motors, microelectronics, sensors).

Highly qualified workforce at affordable costs, presence of technology cluster and established cooperation between companies and domestic universities motivate companies to establish their R&D divisions in Slovakia. Osram, Leoni, Enics, Microstep, BSH are just few examples of EECI companies with strong R&D centers in Slovakia.

SARIO constantly monitors the development in the selected industries and based on investor's requirements can prepare tailor-made sector-specific analyses.

Electronics & Electrical Components Industry in SLOVAKIA
