SARIO Profile

SLOVAK INVESTMENT AND TRADE DEVELOPMENT AGENCY (SARIO) is a governmental investment and trade promotion agency of the Slovak Republic. The agency was established in 2001 and it operates under the Ministry of Economy of the Slovak Republic.

01 INVESTMENT SERVICES

FOR POTENTIAL INVESTORS

- investment environment overview
- organization of the investor's visits of Slovakia
- starting a business consultancy
- sector and regional analyses
- investment incentives consultancy
- site location & suitable real estate consultancy

FOR ESTABLISHED INVESTORS

- identification of local suppliers, service providers
- assistance with expansion preparation and execution
- assistance with Industry 4.0 solutions and R&D implementation

02 FOREIGN TRADE SERVICES

IF YOU ARE LOOKING FOR

- Slovak supplier or sub-contractor
- information about Slovak export/trade environment
- sourcing opportunities
- forming a joint venture, production cooperation or other forms of partnership with a Slovak partner

SERVICES FOR EXPORTERS

- information on foreign territories
- customized search for foreign partners
- online database of business opportunities
- export Training Centre
- subcontracting assistance

03 SLOVAK SPACE OFFICE

FOR SLOVAK ENTITIES

- tailor-made sector entry consultancy
- startup creation through hackathons and incubation programs
- cooperation opportunities through matchmaking events
- internationalization of the Slovak space companies and research institutions

FOR FOREIGN PARTNERS

- customized search for local partners
- assistance with establishing branch in Slovakia
- cooperation on space industry events

PONUKA SPOLUPRÁCE PRE FIRMY

Výskum pre priemysel

Talenty | Laboratóriá | Inovácie

Prečo spolupracovať?

- reálne priemyselné výzvy
- moderné CAD/CAE, CNC a merania
- študenti pripravení na prax
- výskumné a inovačné projekty

Oblasti spolupráce

Vývoj a inovácie

- spoločné VaV projekty
- prototypy a overenie riešení
- digitalizácia výroby

Vzdelávanie a talenty

- zadania tém záverečných prác
- stáže, exkurzie a prax
- nábor absolventov

Technická expertíza

- merania a testovanie
- konzultácie s odborníkmi
- laboratórna infraštruktúra

Máte záujem o spoluprácu?

Ozvite sa nám.

Dohodneme formu spolupráce od jednorazovej konzultácie až po dlhodobé partnerstvo so Strojníckou fakultou TUKE.

Investment Support Association

Your Support Base Since 2011

ISA represents a group of renowned companies operating and providing services for foreign investors in Slovakia. The association operates as a “think-tank” or “support base” for the needs of SARIO and its marketing and project activities at home and abroad. Directly and through its partners ISA provides financial and organizational support for the presentation of Slovakia and investment opportunities in all its regions.

OWASmooth

OWASmooth is a deep-tech software company focused on industrial data processing and data quality enhancement. We help companies transform noisy, unstable, and incomplete data into reliable inputs for analytics, AI, automation, and decision-making.

Our proprietary algorithms enable:

- 70% higher data quality and consistency,
- more stable predictive models,
- process optimisation and cost reduction,
- more than 50% data volume reduction,
- overall dashboards simplification,
- improved monitoring of production lines and industrial systems.

We collaborate with industrial partners, technology companies, and research organisations on real-world data challenges and innovation projects, including joint EU-funded initiatives.

Do your systems generate data? Let's make better use of them.

ORGANISATION DETAILS

COMPANY PROFILE

ROOWAX poskytuje služby v oblasti digitalizácie budov, priemyselných objektov a technických priestorov prostredníctvom 3D laserového skenovania, virtuálnych prehliadok, dronových výstupov a robotického vytyčovania pomocou technológie HP SitePrint. Firma sa zameriava na tvorbu digitálnych modelov, mračien bodov, technickej dokumentácie, interaktívnych 3D prezentácií a podkladov pre BIM/CAD spracovanie. V priemysle a stavebníctve tieto výstupy slúžia na dokumentáciu existujúceho stavu, plánovanie rekonštrukcií, optimalizáciu layoutov, prezentáciu objektov a podporu technického rozhodovania. Služba HP SitePrint umožňuje roboticky preniesť CAD podklady priamo na podlahu stavby alebo priemyselnej haly formou presnej tlače layoutu. Využíva sa pri vytyčovaní priečok, osí, technologických trás, prestupov, regálových systémov, výrobných layoutov a ďalších prvkov. ROOWAX tím prepája digitálne plánovanie s realizáciou v teréne a prináša vyššiu presnosť, rýchlosť a efektívnosť do stavebných a priemyselných procesov.

COOPERATION PROFILE

ROOWAX hľadá partnerov na spoluprácu v oblasti stavebníctva, priemyselných objektov, výroby, logistiky, developmentu, správy budov a digitálnej transformácie. Poskytujeme moderné služby v oblasti 3D laserového skenovania budov, priemyselných hál a technických priestorov, tvorby digitálnych dvojčiat, mračien bodov, virtuálnych 3D prehliadok, dronovej vizuálnej dokumentácie a robotického vytyčovania pomocou technológie HP SitePrint. Naším cieľom je spolupracovať s firmami, ktoré potrebujú presnú digitálnu dokumentáciu existujúcich budov, priemyselných prevádzok alebo stavebných projektov, ako aj s partnermi, ktorí hľadajú inovatívne spôsoby, ako zefektívniť plánovanie, prípravu stavby, správu objektov, BIM/CAD procesy a samotnú realizáciu v teréne. Pomocou 3D skenovania pomáhame firmám zachytiť reálny stav budov a priemyselných priestorov a premeniť ho na využiteľné digitálne dáta pre projektovanie, rekonštrukcie, plánovanie, technickú dokumentáciu a prezentáciu. Technológiou HP SitePrint prinášame robotické vytyčovanie priamo na stavenisko alebo do priemyselnej haly. Riešenie umožňuje rýchlo a presne preniesť CAD/BIM podklady na podlahu – napríklad priečky, osí, otvory, prestupy, TZB trasy, regálové systémy, umiestnenie technológií, výrobné a skladové layouty. Hľadáme spoluprácu so stavebnými firmami, architektmi, projektantmi, developermi, priemyselnými podnikmi, logistickými spoločnosťami, výrobnými závodmi, facility manažérmi, BIM/CAD špecialistami a technologickými partnermi, ktorí majú záujem o digitalizáciu, automatizáciu a efektívnejšie stavebné alebo priemyselné procesy. Naším hlavným cieľom je prepájať digitálne plánovanie s reálnou realizáciou v teréne a pomáhať partnerom znižovať chybovosť, šetriť čas a zlepšovať presnosť, dokumentáciu aj prezentáciu ich projektov.

ORGANISATION DETAILS

COMPANY PROFILE

Naše kľúčové oblasti expertízy sú v oblasti daňovej podpory inovácií. Špecializujeme sa na odpočet na výskum a vývoj (superodpočet) a Patent Box. Poskytujeme aj komplexné dotačné poradenstvo, správu fondov EÚ a štátnu pomoc. Zabezpečujeme aj proces získania osvedčenia o spôsobilosti vykonávať výskum a vývoj. Ak vaša spoločnosť vyvíja nové produkty, technológie alebo optimalizuje výrobné procesy, pomôžeme vám identifikovať skryté zdroje financovania, na ktoré máte zákonný nárok. Naším prístupom minimalizujeme administratívnu záťaž a legislatívne riziká na strane klienta. Odpočet na VaV alebo superodpočet predstavuje strategický nástroj financovania inovácií, ktorý môže firmám priniesť úsporu až do výšky 24 % nákladov na vývojové projekty. Vypočíte si aj Mareka Repka z Ayming v panelovej diskusii o 11:25 – 11:45 – Impulzy pre rast: Štátna pomoc a financovanie inovácií – Ako financovať inovácie a zostať konkurencieschopný? Ayming je medzinárodným lídrom v oblasti strategického poradenstva pre financovanie inovácií, výskumu a vývoja. Už 10 rokov na Slovensku a 40 rokov celosvetovo pomáhame firmám maximalizovať ich konkurencieschopnosť prostredníctvom efektívneho využívania legislatívnych nástrojov, ako je superodpočet na VaV a štátna pomoc. Naším cieľom je premeniť vaše inovačné úsilie na merateľné finančné úspory a udržateľný rast.

COOPERATION PROFILE

Naše portfólio tvoria strategické partnerstvá s progresívnymi spoločnosťami naprieč kľúčovými odvetviami slovenského hospodárstva. Aktívne participujeme na rozvoji inovačného ekosystému prostredníctvom úzkej kooperácie s ministerstvami SR, poprednými výskumnými inštitúciami, univerzitami, podnikateľskými klastrami a inkubátormi zameranými na technologický transfer a podporu startupov.

ORGANISATION DETAILS

COMPANY PROFILE

Stručná charakteristika spoločnosti Skupina BELEVIS sú tí, ktorí skutočne veria, že stavby môžu robiť svet lepším miestom. Materská spoločnosť Belevís, s.r.o. sa venuje real estate developmentu, kde sa zameriavame na prípravu rezidenčných a retailových projektov. Tím ľudí v BELEVIS Construction tieto projekty pretvára na skutočnosť. V spolupráci týchto dvoch firiem vieme uchopiť projekt od prvej myšlienky, cez náročný projektový manažment, až po dokončenie a kolaudáciu stavby. BELEVIS Construction tiež realizuje projekty pre iných investorov, čím sa zväčšuje pole našej pôsobnosti. Nezastavujeme sa pri realizácii stavieb. Stavíme spoločnosť, tím a projekty, ktoré naozaj posúvajú hranice. Nedáme sa odradiť problémami, ale vyhľadávame nové výzvy, ktoré nás posunú ďalej. Riadime sa heslom, že nič nie je nemožné a treba len nájsť vhodnú príležitosť na trhu. S nami budeš súčasťou tímu, ktorý stavia komunitu a príležitosti pre všetkých.

COOPERATION PROFILE

V rámci SARIO hľadáme partnerov z developmentu, investícií, projektovej prípravy aj samotnej výstavby – developerov, investorov, projektantov, technických konzultantov aj spoľahlivých subdodávateľov. Členstvo v tejto komunite vnímame ako priestor na nové kontakty, zmysluplné spolupráce a partnerstvá, ktoré môžu prerásť do konkrétnych projektov. Nehľadáme len jednorazové zákazky, ale vzťahy postavené na dôvere, kvalite a spoločnom ťahu na výsledok.

ORGANISATION DETAILS

COMPANY PROFILE

BETAMONT s.r.o. has been on the market for more than 30 years, developing and integrating its own intelligent transport technologies in road and rail transport. Its portfolio is shaped by the modular concept of Measure-in-Motion®. The company built on more than 80 years of history when it became the successor to the executive unit of Slovak Railways, namely the Signaling and Security Workshops in Košice. It currently operates internationally and develops and integrates its own intelligent transport technologies in road and rail transport. The key area is transport. BETAMONT has a very strong background and knowledge base in this area. The company's research and development activities are thematically focused on intelligent transport systems for roads and railways. The development of a specific product does not end with its launch on the market; efforts to improve and expand its functionality continue with regard to current market requirements or specific implementation projects. "The core of intelligent transport systems is information that needs to be collected, transmitted, integrated and provided". Currently, the product portfolio consists of the Measure-in-Motion concept, variably deployable in the road environment and also in the railway environment. The aim is to obtain the largest possible set of relevant data about the road/rail vehicle itself or traffic flow without limiting the smooth flow of traffic at the measurement point. This is a complex system consisting of several subsystems.

Spoločnosť DELTECH tvorí tím špecialistov, ktorí už tri desaťročia vytvárajú čoraz modernejší a bezpečnejší svet. Prinášame riešenia v oblasti komplexných silnoprúdových a slaboprúdových elektro technológií a technickej ochrany objektov. Ako dodávateľ pre investičné celky vytvárame optimálne technické riešenia v oblasti realizácie malých a stredných stavieb. Poskytujeme záručný a pozáručný servis s krátkou dobou nástupu na území celého Slovenska. Spoločnosť disponuje všetkými potrebnými certifikátmi a oprávneniami pre predaj, projektovanie, realizáciu, ako aj záručný a pozáručný servis. Harmónia medzi skúsenými obchodníkmi, projektovými manažermi, technikmi, servisnými zamestnancami a ostatnými administratívnymi pracovníkmi je predpokladom pre úspešné zvládnutie náročných projektov vyžadujúcich tú najvyššiu kvalitu. Sme skúsení odborníci a pripravíme pre vás na mieru vždy profesionálne riešenie v duchu sloganu „Kvalita a skúsenosti“. DELTECH is made up of a team of specialists who have been creating an ever more modern and safer world for three decades now. We bring solutions in the area of comprehensive High Voltage and Low Voltage electrical installation and technical protection of objects. As a supplier for investment groups, we create optimum technical solutions in the area of carrying out small and medium-sized constructions. We provide warranty and post warranty services with a short arrival time over the entire territory of Slovakia. The company has all the necessary certificates and authorizations for sales, designing, and implementation, as well as guarantee and post-guarantee service. The harmony between experienced entrepreneurs, project managers, technicians, service workers, and other administrative employees is a prerequisite to successfully completing difficult projects requiring top quality. We are experienced professionals and we'll prepare professional tailor-made solutions for you according to our slogan "Quality and experience".

COMPANY PROFILE

Our brand Deutsche Telekom IT Solutions Slovakia entered the life of Košice region in January 2006 under the name T-Systems Slovakia and has been inextricably linked with this region ever since. We proved this the very next year, when we became one of the founding members of Košice IT Valley association. Over the last decade, we have managed to grow from scratch to being the second largest employer in the eastern part of the country. At the same time, with more than 3,900 employees, we are one of the top fifteen largest employers in Slovakia. Thanks to our highly qualified and motivated employees, we are the company with the fastest growth in added value within the IT industry in Slovakia. Our goal is to proactively find new ways to improve and continuously transform into the type of company providing innovative services. In addition to our significant presence in the eastern part of Slovakia, we have an impact also in the western part of the country. Our commitment to serving clients and contributing to the IT industry goes beyond the Košice region. We have also our premises in Bratislava, where we have been actively engaged in delivering innovative IT solutions and services. This dual presence in both eastern and western Slovakia allows us to cater to a broader spectrum of clients and contribute to the technological advancement of the country. The company under the brand T-Systems Slovakia s.r.o. has defined its mission as follows: "We give IT meaning". As part of our strategic activities, we are transforming our company into a modern information and communications technology services provider stepping towards a future based on digital technologies. We implement these steps to move our business from a project-driven model (where we supply the required number of IT experts based on our customer's requirements) to an innovative and product-oriented company model (where we supply and manage products and services during their lifecycle at the customer). We believe that such a transformation can succeed with the right employees who are constantly developing their skills and thus contributing to the professional image of our brand in the market.

COMPANY PROFILE

DREVONAEXPORT is a supplier of wood-based materials and components for industrial, construction and furniture applications. We specialize in particleboard (DTD), MDF, HDF and plywood, as well as custom-made components used in furniture production, packaging, logistics systems and interior projects. Our focus is on helping companies find cost-effective and functional material solutions, including optimization of existing designs and replacement of more expensive materials. We cooperate with manufacturing companies, construction and fit-out partners, furniture producers and logistics providers across Central Europe.

COOPERATION PROFILE

We are looking for cooperation with manufacturing companies, construction and fit-out partners, furniture producers and logistics providers who are seeking cost-effective material solutions. We offer support in optimizing material usage, supplying wood-based components and developing custom solutions for industrial applications, packaging, interior and construction projects. Our goal is to establish long-term partnerships, especially in projects where flexibility, cost efficiency and reliable supply are essential.

We are a family-run business built on the values of responsible entrepreneurship. We care deeply about details, fairness, and professionalism — yet we consider our colleagues to be part of the family. Since 2002, we have been active in the hospitality industry, offering sustainable accommodation and becoming a recognized brand for corporate conferences and events. According to guest reviews on Tripadvisor, we consistently rank as the 6th best-rated hotel in Košice. Located in the city center next to the city park, we are the longest-running sustainable hotel in Slovakia. We bring innovations to support clean mobility and sustainable tourism: we offer special rates for eco-conscious travelers, we provide charging stations for TESLA and other electric vehicles, and we offer 24/7 contactless check-in and check-out via mobile phone for a seamless guest experience.

COOPERATION PROFILE

We are Eco-friendly Hotel Dália, a business hotel in Košice, seeking long-term cooperation with companies and contractors that require reliable accommodation for employees, business travelers, project teams, or visiting partners in Košice. We are interested in establishing corporate accommodation partnerships with flexible booking options, comfortable stays, and tailored services for business clients.

Spoločnosť sa zaoberá, triedením, zhodnocovaním ako aj zneškodňovaním viac než 500 rôznych druhov odpadov. Viac ako 1000 klientom z komunálnej a podnikovej sféry preto poskytujeme komplexné služby založené na snahe maximálne zhodnocovať odpady a to nielen materiálovo, ale aj energeticky. V roku 2000 spoločnosť uviedla do prevádzky modernú spaľovňu nebezpečných odpadov, ktorá je určená na priame oxidačné dvojstupňové kontinuálne spaľovanie tuhého, pastovitého a tiež kvapalného odpadu. Od roku 2017 dokážeme tieto odpady zhodnocovať činnosťou R1, čím prispievame k ďalšiemu znižovaniu množstva odpadov určených na skládkovanie.

COMPANY PROFILE

Our mission is to create a world where financial processes are fully digital and automated. Our goal is simple: fully automate financial workflows so your team can focus on what really matters. Fitek reduces repetitive tasks through intelligent automation – saving time, improving accuracy, and delivering real-time visibility into spending, cash flow, and approvals. We believe automation shouldn't be limited to large enterprises. That's why we build scalable solutions that bring speed, accuracy, and control to finance teams of any size. Our history Fitek was born in Estonia and grew into a trusted automation partner across Europe. After a successful chapter with Unifiedpost Group, Fitek re-emerged in 2024 under its original name, led by former CEO Mait Sooru and backed by BaltCap. Today, over 2,000 businesses and 40,000 users – from governments to airports to accounting firms – rely on Fitek to streamline their financial operations. Our journey is grounded in deep industry know-how, and we remain focused on building the future of bookkeeping automation.

COOPERATION PROFILE

We are looking for companies that want to help with the digitalization and automation of accounting processes.

COMPANY PROFILE

GEODETICCA VISION is a technological company focused on Earth Observation, GeoAI and Digital Twins. We develop advanced AI-driven geospatial solutions that transform satellite, aerial and mobile mapping data into actionable information for decision-making. Our flagship platform CARTOGRAPHER.AI enables automated large-scale mapping and vectorisation of geospatial features from imagery in near real time. The platform is designed for applications such as smart cities, urban planning, infrastructure management, environmental monitoring, energy, transport and security. The company has extensive experience in ESA (European Space Agency) projects and development of scalable AI models for geospatial analytics, including foundation models trained on large Earth Observation datasets using European HPC infrastructure. We combine expertise in geodesy, GIS, AI, computer vision and software engineering to deliver end-to-end geospatial solutions ranging from data acquisition and processing to analytics, visualisation, decision-making support and decision-making automation.

COOPERATION PROFILE

GEODETICCA VISION is looking for strategic partners, technology integrators, infrastructure operators, public institutions and innovative companies interested in applying GeoAI and Digital Twin (especially Urban Digital Twins) technologies in real-world operations. We are particularly interested in cooperation in: * smart cities and urban digital twins, * energy and utility infrastructure monitoring, * transport and road infrastructure management, * environmental monitoring, * AI-driven geospatial analytics, * Earth Observation applications, * defence and security use cases, * integration of geospatial AI into enterprise workflows and decision-support systems. We are open to joint R&D activities, pilot projects, commercial partnerships, international collaborations and integration partnerships across Europe and beyond.

Gronbach Michalovce is a modern manufacturing plant of the Gronbach Group focused on the production of components and complex solutions for the home appliance and industrial sectors. The plant has strong technological capabilities in sheet metal processing, laser cutting, bending, welding, powder coating, and assembly operations. Our production is supported by high quality standards, automation, and continuous optimization of manufacturing processes. Our customers include leading international companies in the premium appliances and industrial markets. We are focused on reliable deliveries, technical know-how, flexibility, and long-term business partnerships. Currently, we are further developing our production capacities, automation, digitalization, and cooperation with new business partners within the Central European region.

COOPERATION PROFILE

Within the B2B meetings organized by SARIO, we are mainly interested in establishing cooperation with reliable industrial partners and suppliers in the following areas: sheet metal processing and machining, welding and metal fabrication, powder coating and surface treatment, automation and robotics solutions, industrial engineering and technical support, suppliers of production materials and components, logistics and packaging solutions, maintenance and technical services, digitalization and smart manufacturing solutions. We are also open to discussions with potential customers and technology partners for long-term industrial cooperation and future development projects.

The Industrial Property Office of the Slovak Republic is the national authority responsible for the protection and administration of industrial property rights in Slovakia, including patents, trademarks, industrial designs, utility models, geographical indications and appellations of origin. The Office supports innovation, technology transfer, entrepreneurship and internationalisation of Slovak companies through awareness-raising activities, IP education, expert consultations and cooperation with international partners such as the European Patent Office (EPO), the European Union Intellectual Property Office (EUIPO) and the World Intellectual Property Organization (WIPO). The Office actively contributes to strengthening the Slovak innovation ecosystem by connecting intellectual property protection with business development, commercialization and international competitiveness, particularly for SMEs, startups, research institutions and innovative enterprises.

COOPERATION PROFILE

The Industrial Property Office of the Slovak Republic is looking to connect with innovative companies, startups, SMEs, research institutions and technology transfer stakeholders interested in intellectual property protection, commercialization and innovation support. We offer expert consultations in the areas of patents, trademarks, industrial designs, utility models and IP strategy, with a focus on supporting business development, branding, technology transfer and international competitiveness. We are particularly interested in cooperation with innovative enterprises, regional innovation ecosystems, incubators, clusters, universities and organizations supporting entrepreneurship and R&D activities.

Košice Self-Governing Region (KSK) is one of the eight self-governing regions of Slovakia, located in the eastern part of the country. The region covers an area of approximately 6,754 km² and has a population of around 800,000 inhabitants. Its administrative and economic center is the city of Košice, the second-largest city in Slovakia. KSK is known for its strong industrial tradition, growing IT and innovation sector, rich cultural heritage, and unique natural attractions, including UNESCO-listed caves and the Slovak Paradise National Park. The region supports regional development, education, transport infrastructure, tourism, and international cooperation projects across Central and Eastern Europe.

COOPERATION PROFILE

At SARIO Business Day, I am mainly interested in companies and partners focused on innovation, smart industry, IT solutions, business internationalization, and regional development. I am looking forward to connecting with organizations that support modern technologies, investments, and international cooperation.

ORGANISATION DETAILS

COMPANY PROFILE

M2M Solutions je inovatívna technologická spoločnosť, ktorá sa špecializuje na vývoj pokrokových riešení pre riadenie dodávateľského reťazca založených na štandardoch Industry 4.0. Vďaka 15 rokom trvalého a dynamického rastu boli naše riešenia úspešne implementované vo viac ako 12 krajinách po celom svete. Naš špecializovaný vývojový tím sa podieľa na celom životnom cykle produktu – od počiatočného návrhu až po implementáciu v plnom rozsahu – so zameraním na znižovanie zásob, optimalizáciu skladových procesov, integráciu autonómnych mobilných robotov (AMR) a nasadzovanie inteligentných bezkontaktných systémov s cieľom vytvoriť plynulé a efektívne dodávateľské reťazce. Naše riešenia pomáhajú dosahovať optimálne výsledky a zároveň znižovať negatívny vplyv podnikania na našu planétu. Rozširujeme sa aj mimo tradičných odvetví a naše pôsobenie sme úspešne diverzifikovali aj do vesmírneho sektora. Aktuálne spolupracujeme na niekoľkých výnimočných projektoch.

COOPERATION PROFILE

Navrhujeme a implementujeme riešenia pre sklad, internú logistiku a výrobu, ktoré prepájajú softvér a autonómne technológie do riadeného systému. V praxi to znamená, že prevádzky dokážu zlepšiť tok materiálu, znížiť chybovosť a stabilizovať výkon – podobne ako v našich realizovaných projektoch. Riešenia prepájame s existujúcimi systémami bez nutnosti zásadných zmien v prevádzke. Kde riešenia prinášajú najväčší dopad: – plynulý tok materiálu medzi skladdom, výrobou a expedíciou, – zrýchlenie a sprehľadnenie procesov tam, kde dnes vznikajú zdržania, – zníženie chybovosti a výpadkov pomocou inteligentných systémov, – automatizáciu tam, kde manuálne procesy obmedzujú výkon. Riešenia realizujeme ako ucelené projekty s možnosťou ďalšieho rozvoja podľa potrieb prevádzky.

ORGANISATION DETAILS

COMPANY PROFILE

MATSUKO is a deep tech startup building holographic presence technology that makes remote collaboration feel physically real. We lead with XR training and education — enabling experts and instructors to appear as life-size holograms in any location, eliminating the gap between in-person and remote learning. Beyond training, our platform extends into holographic communication, remote assistance, and XR collaboration, serving enterprise clients across industries where physical presence has traditionally been non-negotiable. We're early-stage on some verticals and scaling on others, actively looking for partners, pilots, and integrations that push the boundaries of how people connect and learn at a distance.

COOPERATION PROFILE

We are actively seeking enterprise clients ready to pilot or deploy holographic presence technology, resellers looking to expand their XR and immersive tech portfolio, and academic institutions interested in joint R&D. MATSUKO can engage as a technology supplier, R&D partner, or joint venture partner depending on the fit. In return, we are looking for distribution reach, domain expertise, investment, and committed customers who want to shape how holographic communication enters their industry.

ORGANISATION DETAILS

COMPANY PROFILE

Nidex Technology s. r. o. is a Slovak technology company focused on the design, delivery and integration of intelligent energy and utility metering systems, industrial automation and operational data acquisition. The company provides technical services for industrial facilities, public buildings, administrative premises and infrastructure operators that require reliable monitoring of energy consumption and technological processes. Our core activities include the design of metering architectures, selection and integration of measurement devices, implementation of communication infrastructure and collection of data from electricity, heat, gas, water and other technological media. We integrate field devices through industrial communication protocols such as Modbus RTU/TCP, Ethernet and other standard interfaces, with the objective of creating a stable and scalable data layer for monitoring, reporting and further analysis. Nidex Technology also focuses on energy management, IoT solutions, data analytics and the digitalization of operational processes. Our solutions help customers obtain structured and reliable data from their technologies, identify inefficiencies, improve transparency of energy consumption and support better technical and operational decision-making. The company does not primarily act as a product manufacturer, but as a technical and integration partner capable of connecting hardware, communication networks and data systems into one functional solution.

COOPERATION PROFILE

We are looking for a cooperation partner in the field of intelligent energy metering, industrial automation, IoT infrastructure, energy management, data acquisition and digitalization of operational processes. We are interested in cooperation with system integrators, technology suppliers, engineering companies, providers of measurement devices, energy management companies, IoT solution providers and companies involved in industrial or building automation. The preferred partner should have experience with technical infrastructure, communication networks, metering systems, BMS/SCADA integration or operational data platforms. Our goal is to identify partners for joint project implementation, technology integration, distribution of compatible hardware solutions, and cooperation in projects focused on energy monitoring, utility metering, process data collection and digital transformation of industrial and building operations.

ORGANISATION DETAILS

COMPANY PROFILE

Oberbank offers its customers the highest quality of advice. Security, stability and sustainability are the foundation of all our actions. Our nine strategic principles determine our path to success. Priority goal: safeguarding the independence and autonomy of Oberbank Oberbank's focus on this goal ensures that all the bank's activities will always serve the interests of its customers, shareholders and employees in a well-balanced manner, now and in the future. This priority goal is the basis and guiding principle of all of Oberbank's other objectives. High quality of advisory services – Corporate clients benefit from our high level of expertise in cross-border business, our know-how in investment financing and our range of alternative forms of financing such as equity and mezzanine capital. – We offer private clients a high level of advisory competence, especially in private banking and housing finance. Continuous organic growth Oberbank is growing organically through the establishment of new branches and the competent support and acquisition of new customers on site. Concentration on Risk Management An important criterion for success is our consistent risk management. Oberbank only takes on risks it can handle on the strength of its own resources. Safeguarding long-term liquidity To offer clients security, we aim to refinance loans with deposits. In addition, freely available assets and refinancing lines with other banks and institutional investors secure our liquidity. Oberbank does not engage in any noteworthy proprietary trading detached from customer business and does not conduct any risky speculative transactions. Strategic staff development Our employees are the foundation of our success. That is why we invest heavily in training and development as well as in the professionalism of our managers. Ensuring long-term competitiveness by focusing on lean processes Our clear goal is the ideal combination of the analogue and digital world! We have digitalised the majority of our internal processes – and thus created more time for consulting. Sustainability Sustainable thinking and action have always been an integral part of Oberbank's strategy. We are committed to the 1.5 degree target of the Paris Climate Agreement and want to steer capital flows even more strongly in the direction of sustainable investments. Based on these principles, Oberbank has developed a Code of Conduct containing the guidelines of our business policy and the minimum standards for the conduct of Oberbank and the persons acting for the institution.

ORGANISATION DETAILS

COMPANY PROFILE

We are a moving company with 25 years of experience on the market. Our core business is B2B relocations, providing complete moving services for office spaces, production halls, warehouses, and technologies. We operate throughout Slovakia, with our headquarters in Bratislava and a branch office in Košice. We have our own warehouse facilities, where we provide not only standard storage and cross-docking services, but also tailor-made solutions for clients in e-commerce, distribution, and manufacturing. We offer comprehensive logistics services, including delivery of goods to end customers as well as additional follow-up support services. As part of a larger holding group, we are supported under the same ownership structure by our own staffing agency. This allows us to respond flexibly to our clients' personnel requirements in addition to logistics and relocation services. For example, we can relocate an entire production facility while also providing qualified personnel ranging from management positions to production staff.

COOPERATION PROFILE

We are looking for partners for whom we can provide a comprehensive portfolio of services including relocation, transportation, warehousing, and complete logistics solutions. We are currently seeking potential cooperation opportunities in the Eastern Slovakia region.

ORGANISATION DETAILS

COMPANY PROFILE

Sapience AI is the first sovereign GPU cloud provider based out of Bratislava, delivering high-performance AI compute to enterprises, research institutions and AI developers across Central and Eastern Europe. Our infrastructure runs on NVIDIA RTX PRO 6000 Blackwell GPUs hosted in Tier III data centres on EU soil, giving the region a GDPR-aligned, low-latency alternative to US hyperscalers. Our positioning is the "CoreWeave of CEE": purpose-built GPU capacity, transparent pricing, and full European data residency.

COOPERATION PROFILE

Project idea and main goals. We are executing Phase 1 of our buildout, a 2 MW deployment in Bratislava, and laying the groundwork for a multi-site footprint across CEE to meet rapidly accelerating demand for sovereign AI infrastructure in the region. Cooperation requested (Investor). Sapience AI is raising €27M to fund Phase 1. We welcome conversations with venture capital, growth equity, infrastructure funds, family offices, and sovereign or strategic investors interested in the European AI infrastructure thesis. Both lead and co-investor positions are open. No geographic restriction. Cooperation offered (Supplier). We supply on-demand and reserved Blackwell-class GPU compute to AI startups, enterprises, research labs and public-sector projects that require sovereign, EU-resident compute. We are well suited as a trusted compute supplier for partners building AI products in CEE and beyond, with options for dedicated capacity, multi-tenant access, and bespoke enterprise contracts. Further details. Tier III certified data centres, renewable power options, Slovak legal entity, full EU data residency. Open to partners globally with no geographic constraint on investor or customer origin.

ORGANISATION DETAILS

COMPANY PROFILE

Vesmírny priemysel nie je len pre veľké krajiny – aj slovenské firmy môžu zohrávať dôležitú úlohu v tomto rýchlo rastúcom odvetví. Celosvetovo ide o biznis v hodnote stoviek miliárd eur, pričom jeho objem sa podľa odhadov v nasledujúcich rokoch vyšplhá nad hranicu 1 trilióna dolárov. Ako sa môžu slovenské firmy zapojiť do tohto segmentu? V čom vie SARIO pomôcť pri vstupe do sektora? Aké sú možnosti financovania? Ako získať projekty s Európskou vesmírnou agentúrou a stať sa súčasťou európskych dodávateľských reťazcov pre veľkých systémových integrátorov? Odpovede na tieto otázky predstaví Kristián Ondáč, manažér pre rozvoj sektora z priemyselnej zložky Slovenskej vesmírnej kancelárie na SARIO.

COMPANY PROFILE

TECHNODAT je technologická spoločnosť pôsobiaca v oblasti digitálneho inžinierstva, správy životného cyklu výrobkov (PLM), technických dát a automatizácie. Už viac ako 30 rokov dodáva inovatívne riešenia pre priemyselné podniky v strednej Európe. Od automobilového a strojárkeho priemyslu, cez energetiku až po vývoj komplexných výrobkov a infraštruktúry. TECHNODAT je certifikovaným partnerom spoločností Dassault Systèmes, AUCOTEC a ďalších globálnych hráčov. Na Slovensku a v Českej republike je lídrom v nasadzovaní platforiem ako 3DEXPERIENCE, Engineering Base, CATIA, DELMIA, ENOVIA, CARAT a vlastného riešenia CRMPLUS, ODOO.

COOPERATION PROFILE

Hlavným cieľom spoločnosti TECHNODAT na slovenskom trhu je posilňovať svoju pozíciu strategického partnera pre priemyselné podniky v oblasti digitalizácie, riadenia životného cyklu produktov a efektívneho využívania technických dát. Aktívna účasť na platformách, ako je fórum SARIO, nám umožňuje byť súčasťou kľúčového dialógu o budúcnosti priemyslu, inovácií a investícií na Slovensku. Vystúpenie našich expertov, vrátane Lenky, pritom nevnímame len ako prezentáciu know-how, ale najmä ako príležitosť budovať vzťahy, zdieľať skúsenosti a otvárať nové obchodné a partnerské príležitosti v kontexte moderného, digitálne riadeného priemyslu.

COMPANY PROFILE

We provide qualified teams for industrial assembly line installation and technical support services worldwide. Our main experience is in the automotive industry, but we also successfully complete projects in other sectors such as food production, wood processing, and manufacturing industries. Our teams have worked on projects across Europe, Africa, America, and Asia. We can operate both on a manpower supply basis and on fixed-price projects according to customer requirements. Currently, we are involved in major projects including Volvo in Košice and Magna in Italy. We are also developing a training and technical center focused on improving worker skills, practical training, and future production activities.

COOPERATION PROFILE

We are looking for long-term cooperation partners, subcontracting opportunities, investors, and industrial project collaborations worldwide. We offer experienced installation and assembly teams for production lines, industrial equipment, and factory installations. We are open to both manpower cooperation and complete fixed-price project delivery. We are interested in partnerships with manufacturers, EPC contractors, automation companies, and industrial suppliers looking for reliable execution partners. As part of our long-term development, we are building a training hall for workforce qualification and preparation for future production and industrial operations.

Thank you!
