- information on foreign territories
- customized search for foreign partners
- online database of business opportunities
- export Training Centre
- subcontracting assistance

03 INNOVATION SOURCING

- matching local tech companies with the operations of large companies that plan to implement innovative solutions to streamline and optimize their processes
- focused mostly on Industry 4.0 solutions such as digitalization, intelligent automation, and robotics as well as advanced and complex IT solutions for various industries
- based on a database of more than 300 local tech companies which is constantly updated and expanded

04 SLOVAK SPACE OFFICE

FOR SLOVAK ENTITIES

- tailor-made sector entry consultancy
- startup creation through hackathons and incubation programs
- cooperation opportunities through matchmaking events
- internationalization of the Slovak space companies and research institutions

FOR FOREIGN PARTNERS

- customized search for local partners
- assistance with establishing branch in Slovakia
- cooperation on space industry events

ESG PORADENSTVO

Čo je ESG?

Environmentálne, sociálne a riadiace aspekty (ESG) vznikli pôvodne ako súbor kritérií pre hodnotenie zodpovedného správania podnikov pre investorov. V súčasnosti pod týmto pojmom rozumieme udržateľnosť podnikania ako takú a je súčasťou finančného riadenia spoločnosti.

ENVIRONMENTAL

Environmentálne faktory

- klimatické zmeny
- odpadové hospodárstvo a znečisťovanie
- využívanie obnoviteľnej

SOCIAL

Sociálne faktory

- dodržiavanie ľudských práv
- rozmanitosť, inklúzia, rovnaké príležitosti
- vplyv na miestnu komunitu,

GOVERNANCE

Faktory riadenia spoločnosti

- obchodná etika
- kvalita manažmentu
- nezávislosť členov

Obsah poradenstva:

- úvodné posúdenie existujúceho stavu spoločnosti, matica významnosti,
- GAP Analýza,
- CSRD smernica,
- ESRS štandardy – povinné aj dobrovoľné,
- poznanie rizík a príležitostí s finančným vplyvom na spoločnosť,
- návrh na odstránenie existujúcich rizík,
- výpočet uhlíkovej stopy,
- návrh environmentálnych riešení na zníženie uhlíkovej stopy spoločnosti (rozsah 1 – 3),
- double materiality – dvojité posúdenie významnosti,
- návrh ďalších krokov na zlepšenie existujúceho stavu,
- nastavenie cieľov vo vzťahu so 6 piliermi taxonómie EÚ,
- príprava environmentálnych projektov s pomocou externých partnerov od návrhu projektu až po jeho realizáciu.

KOMPLEXNÝ BALÍK SLUŽIEB

pre výrobcov (dovozcov)
na jednom mieste

- **Obaly a neobalové výrobky**
- **Elektrozariadenia a fotovoltaické panely**
- **Batérie a akumulátory**
- **Spoľahlivosť** - 14 rokov skúseností
- **Dôveryhodnosť** - partner pre viac ako 1400 výrobcov
- **Medzinárodné pôsobenie** - Česká republika, Nemecko, Poľsko
- **Garancia** plnenia zákonných povinností

CYBER COMPETENCE AND CERTIFICATION CENTRE IN THE ROLE AS NATIONAL COORDINATION CENTRE NCC-SK

- In the European Union, a common European community for cybersecurity competences is being established, with membership open to entities from all member states
- NCC-SK currently has more than 120 members in the cyber community
- Each member is represented in a working group according to their area of focus. Cyber community working groups enable members to share their knowledge and experiences and collaborate to achieve common goals.
- Important part of the services for the community comprises raising awareness on various opportunities for projects funding and collaboration with members from other EU countries.

SLOVAK NATIONAL HYDROGEN ASSOCIATION

We contribute to the transformation of Slovak energy, industry and transport to a low-carbon one.

MAIN GOALS:

-  Implementation of best practices within the Slovak Republic, formation of effective public policy and creation of legislation.
-  Creating opportunities for our members to showcase their company, network, learn and collaborate.
-  Hosting regular hydrogen events and recording podcasts on clean energy.

STU

KTO SME?

Sme skupina odhodlaných študentov, ktorí sa vo svojom voľnom čase venujú návrhu a konštrukcii pretekárskeho monopostu. Vďaka tomu prenášame do praxe naše znalosti zo strojárstva, elektrotechniky, informatiky a rozvíjame zručnosti tímovej práce, projektového manažmentu a komunikácie.

STUBA Green Team je podporovaný množstvom spoločností, ktoré v spolupráci s nami vidia význam. S ich pomocou sme schopní pravidelne sa zúčastňovať na súťažiach po celej Európe, kde súperíme s ďalšími univerzitnými tímami v rámci pretekov Formula Student Electric.

Investment Support Association

Your Support Base Since 2011

ISA represents a group of renowned companies operating and providing services for foreign investors in Slovakia. The association operates as a “think-tank” or “support base” for the needs of SARIO and its marketing and project activities at home and abroad. Directly and through its partners ISA provides financial and organizational support for the presentation of Slovakia and investment opportunities in all its regions.

ORGANISATION DETAILS

COMPANY PROFILE

Najväčšie slovenské výstavisko V súčasnosti nesie výstavisko názov agrokomplex NÁRODNÉ VÝSTAVISKO, štátny podnik a patrí medzi najvýznamnejšie veľtrhové a výstavnícke spoločnosti v SR a jeho význam potvrdzuje 50 rokov tradičných ale aj inovatívnych, no hlavne jedinečných podujatí. Poslaním podniku v oblasti výstavníctva je podporovať komunikáciu medzi spoločnosťami i podnikateľmi, s existujúcimi, a tiež potenciálnymi zákazníkmi na národnej aj medzinárodnej úrovni. Ďalej to je aj snaha rozvíjať obchod a medzinárodnú ekonomickú i vedecko-technickú spoluprácu, organizovaním veľtrhov a výstav vo vlastnom areáli, ako aj národných expozícií SR v zahraničí. Výstavná činnosť je hlavne o vytváraní komunikačných príležitostí pre odbornú a laickú verejnosť, o poskytovaní priestorov na zábavu, kultúrne i spoločenské podujatia.

COOPERATION PROFILE

agrokomplex NÁRODNÉ VÝSTAVISKO, štátny podnik, sa už desaťročia spája s maximálnou efektivitou využívania výstavných priestorov spolu s precíznymi riešeniami požiadaviek vystavovateľov. Tieto a iné kvality sa dekadami realizácií obrovského množstva výstav, projektov, akcií a spoluprác dostali na vrchol možností priameho marketingu vo všetkých jeho podobách.

COMPANY PROFILE

Since 1993 AmCham Slovakia has been on a mission to make Slovakia a better place to live and do business. We have quickly developed into one of the most active foreign chambers of commerce/business communities in the country. Together with our almost 300 member companies, we share a vision of Slovakia as a globally competitive, innovation-driven, and sustainable country that can thrive in the fast-changing world of the 21st century. Over the past decades, AmCham has played a vital role in promoting rule of law and innovation ecosystem, increasing competitiveness of the national economy and developing effective and transparent business practices via four critical policy/advocacy pillars. AmCham has also developed a strong presence in regions of Slovakia with approximately 70 member companies with operations throughout the country. We strive for a positive change in the regions not only by helping transform industries through innovation, but also by highlighting the importance of untapped potential hidden in the so-called triple helix ecosystem (public offices, industries, schools). Thanks to our broad and overarching membership base and extensive network of contacts cutting through business, academia, NGO, and public sector, AmCham is ideally positioned to make things happen not only on a national level, but also directly in the regions of Slovakia.

ORGANISATION DETAILS

COMPANY PROFILE

CEIS Slovakia is the Slovakian branch office of its Budapest-based parent company, Central European Investment Services (CEIS). Both organizations provide high-level and tailor-made consultancy services for corporate clients, such as: – site selection for potential large foreign investors, – providing information on state subsidies in the CEE region, – project management services, – compiling market analysis, – export promotion for companies which would like to enter Slovakian or Hungarian markets, – managing company formation and incorporation processes for clients interested in entering the Slovakian market. Our clients are mainly large companies primarily from the automotive sector but we also aim to provide various services for SMEs as well.

COOPERATION PROFILE

CEIS Slovakia seeks industrial, production and/or innovative companies which would like to expand to countries in the CEE region or would like to growth with the help of various national and EU funds.

COMPANY PROFILE

The Center for International Private Enterprise (CIPE) is a global organization that works to strengthen democracy and build competitive markets in many of the world's most challenging environments. Working alongside local partners and tomorrow's leaders, CIPE advances the voice of business in policy making, promotes opportunity, and develops resilient and inclusive economies. Established in 1983, CIPE is a non-profit affiliate of the U.S. Chamber of Commerce and a core institute of the National Endowment for Democracy. CIPE currently has more than 200 programs and grants in over 80 countries. CIPE works with local business leaders to expand the opportunity for inclusive growth through market-led solutions. CIPE programs promote a rule-based system which emphasizes principles of democratic governance, enables entrepreneurship, opens trade, and fights corruption. CIPE and its global partner network create knowledge and practical tools to drive local change.

COMPANY PROFILE

Decent Cybersecurity is a provider of quantum-resistant cybersecurity solutions, catering to vital industries such as Aerospace, Defence, Satellite Communications, Drone and Unmanned Traffic Management. Distinguished by its innovative use of AI and blockchain technology, the company ensures superior data protection, system integrity, and confidentiality for high-security sectors. We hold industrial certificate from the National Security Authority, granting clearance up to the classification level "Secret" both at the national level and in alignment with EU and NATO standards. With a team of experts, engineers and cybersecurity auditors, we are recognized for innovation and excellence in today's strategic sectors. Decent Cybersecurity je poskytovateľom kybernetických bezpečnostných riešení odolných voči kvantovým útokom, zameraných na kľúčové odvetvia ako letectvo a kozmonautika, obrana, satelitná komunikácia, manažment dronov a bezpilotnej prevádzky. Naša spoločnosť sa vyznačuje inovatívnym využitím umelej inteligencie a blockchain technológie, čím zabezpečuje vyššiu úroveň ochrany dát, integrity systémov a dôvernosti pre sektory s vysokými bezpečnostnými požiadavkami. Disponujeme priemyselným certifikátom od Národného bezpečnostného úradu, ktorý nám udeľuje oprávnenie až do úrovne utajenia "Tajné", a to tak na národnej úrovni, ako aj v súlade s normami EÚ a NATO. S tímom expertov, inžinierov a auditorov kybernetickej bezpečnosti sme uznávaní pre našu inováciu a excelenciu v strategických sektoroch.

COOPERATION PROFILE

At the upcoming matchmaking forum, Decent Cybersecurity is actively seeking connections with: Companies from critical industries affected by NIS2 regulations, including but not limited to: • Energy • Transport • Banking • Financial market infrastructures • Health • Drinking water • Digital infrastructure • ICT service management • Public administration • Space • Postal and courier services • Waste management • Chemicals • Food • Manufacturing • Digital providers • Aerospace • Defence • Satellite Communications • Drone and Unmanned Traffic Management Government administration entities We aim to provide these organizations with: • Cybersecurity audits • Cybersecurity consulting • Cybersecurity management services If your organization operates in these critical sectors or government administration and requires robust, quantum-resistant cybersecurity solutions to meet NIS2 compliance, we look forward to meeting you at the forum.

ELMAX ŽILINA, a.s. is a distinguished Slovak producer of electrical equipment up to 1000V/2500A. We have been on the market since 1993. In all our operations we rely on the longstanding experience of our personnel and our rich tradition in the industry. We carry out a whole array of manufacturing, technical, installation, organisation, distribution and servicing activities. Our company's manufacturing and sales premises and seat are located in the industrial zone of Bytčica, Žilina. We currently employ 150 people. Our company has an established certified quality management system in accordance with ISO 9001, which documents the quality of our work in all areas and guarantees its continuous improvement. Our company also holds a CE certificate for the EU market and UL certificate for the US and Canadian markets. Our core production programme includes the manufacturing of both standardised and customised switchboards up to 1000V/2500A for civil engineering applications in the civic and industrial sectors, applications in the energy sector, signalling, regulation and control in technological processes, cabinet systems and reactive power compensation devices. Our operations also include electrical equipment installation and maintenance services.

COOPERATION PROFILE

We are looking for potential business partner to offer our capacities in production and delivery of low voltage electrical cabinets, electrical panels CE and UL listed, sheet metal parts and components as well as more complex technological equipments such as machine modules or specific customized industrial applications for different industrial sectors. We also offer our own production of air filtration and extraction equipments, biohazard cabinets and phytosanitary boxes for pharmaceutical industries and hospitals.

COMPANY PROFILE

ESG KLUB is a business platform, oriented towards education, inspiration and networking in the ESG agenda. It is a response to the topicality of this issue and at the same time a natural response to demand from companies. Through systematic education, we want to deliver the latest knowledge about ESG to you – companies, inspire you with examples from practice and create attractive networking formats for you, which will bring you new business opportunities and connections through a deeper insight into the field of ESG. ESG KLUB je biznisová platforma, orientovaná na vzdelávanie, inšpiráciu a networking v téme ESG. Je reakciou na aktuálnosť tejto problematiky a zároveň prirodzenou reakciou na dopyt zo strany firiem. Systematickým vzdelávaním chceme doručiť najnovšie poznatky o ESG aj vám – firmám, inšpirovať vás príkladmi z praxe a vytvárať pre vás atraktívne networkingové formáty, ktoré vám prinesú nové obchodné príležitosti a prepojenia prostredníctvom hlbšieho náhľadu do oblasti ESG.

COOPERATION PROFILE

We would like to meet with representatives of commercial companies, educational institutions, public administration and municipalities bodies, non-governmental organizations and individuals who have a need and are motivated to orient in current ESG issues. We are looking for professionals for whom ESG is not only a challenge, but also a business opportunity. Radi sa stretneme so zástupcami komerčných firiem, vzdelávacích inštitúcií, orgánov verejnej správy a samosprávy, mimovládnych organizácií i s jednotlivcami, ktorí sa snažia zorientovať v problematike ESG. Hľadáme profesionálov, pre ktorých je ESG nielen výzvou, ale aj biznisovou príležitosťou.

COMPANY PROFILE

ESM-YZAMER, energetické služby a monitoring s.r.o. je spoločnosť, zaoberajúca sa službami v energetike pôsobiaca na európskom trhu viac ako 25 rokov. Je spoločnosťou s tradíciou a stabilitou založenou na množstve spokojných klientov a partnerov, ktorým zabezpečuje komplexné služby v energetike využívajúc najmodernejšie technológie. Portfólio produktov a služieb je vytvorené na základe potrieb zákazníkov a vyznačuje sa komplexnosťou a profesionalitou v oblasti energetiky, obnoviteľných zdrojov energie, riadenia technológií, merania a monitoringu spotrieb a energetických služieb zabezpečujúcich znižovanie energetickej náročnosti so zameraním aj na solárne panely. Doménou spoločnosti je návrh, realizácia a servis najnovších technológií v oblasti výroby, prevádzky a merania energií, inteligentného riadenia procesov ako aj odborného energetického poradenstva. Financovanie vlastného vývoja v oblasti smart meteringu, riadenia a regulácie zabezpečuje spoločnosti vždy najnovší technologický postup a napredovanie.

COOPERATION PROFILE

Hľadáme partnerov v nasadzovaní kogenerácie a trigenerácie využívajúcich zelené palivá a v krátkom horizonte vodíka. Dodávané technológie /mikroturbíny Capstone / sú stabilné zdroje energie a nasadzujeme ich ako zálohu na nestabilitu OZE . Vo výrobných podnikoch je zariadenie nasadzované ako vlastná výroba elektriny ,tepla a chladu čím dosiahneme nezávislosť od distribútora a zníženie nákladov na energie.

COMPANY PROFILE

FUERGY Industries j.s.a. is a Slovak company founded by specialists with decades of experience in energy optimization. Our proprietary solutions feature our flagship product, brAln by FUERGY, a smart battery energy storage system and more. We integrate battery technologies from leading companies such as PYLONTECH and HUAWEI and tailor them to our customers' needs, maximizing their ROI by implementing our Energy Management System. Additionally, we offer balancing group management, trading department services, technology management, auxiliary services and various solutions for distributors/energy providers.

COOPERATION PROFILE

From the 'Cooperation offered' perspective, we are primarily seeking partners who require energy optimization and management for their company, production, or partner companies. We can position ourselves as a subcontractor to companies that deliver complex energy projects by providing them with our battery systems, energy management systems, and more. Our primary markets are Slovakia and Czechia, but we are open to partnerships and joint ventures in other countries if they prove to be interesting. From the 'Cooperation requested' perspective, we are looking for partners who either distribute the technology we use in our systems or are firms that can help us deliver our solution from project development to implementation, acting as a strong partner, potentially even in markets other than Slovakia and Czechia.

COMPANY PROFILE

For more than 30 years IPESOFT company has been developing innovative software technologies that are an important part of the management of Slovakia's energy system. All products and services that the IPESOFT company supplies to customers are original, developed by its own engineering capacities. In software development, it deals with two areas. The first area is basic real-time software technologies, intended for business-critical applications and the second area is software applications for energy and industry. We deliver solutions that are oriented to the optimization of electricity production processes, trading processes and risk management in the energy market and for new business models that create space for example entities that provide flexibility with the use of battery storage.

COOPERATION PROFILE

We cooperate with small and large companies in energy, industry and transport. We offer: – complex IT solutions, – business process automation and purchase decision support, – optimization and planning production and trade with heat and electricity

COMPANY PROFILE

KONsys Kft. specializes in providing advanced energy management solutions tailored to the specific needs of businesses, from small enterprises to large multinational corporations. The company offers two primary systems: EnergyXpert Energy Management Solution, developed in collaboration with IntelliSense Ltd., which is tailored for businesses seeking an easily integrable, scalable, flexible, and cost-effective energy management solution powered by AI and AVReporter Energy Management Software developed in-house by our expert engineering team, is specifically designed to meet the advanced and complex visualization needs of enterprises. Both solutions focus on optimizing energy consumption through innovative technologies such as real-time monitoring, machine learning, and advanced data analytics. The systems are customizable, scalable, and capable of handling complex data visualizations, including vector graphics, without significant capital investment. KONsys Kft. is committed to empowering businesses by helping them improve energy efficiency, reduce costs, and contribute to sustainability. In addition, our global partner IntelliSense further enhances these offerings with its expertise in IoT, AI-powered energy management, and seamless integration with a wide range of industrial systems.

COOPERATION PROFILE

Our company, KONsys Ltd., aims to showcase our own developed energy management solutions, which optimize energy consumption for both large corporations and smaller businesses. We are looking for partners who can act as resellers of our products, as well as companies capable of integrating our solutions for various industrial and economic sectors, particularly in Slovakia. The ideal partner is experienced in bringing technological solutions to market, has local connections, and possesses a strong understanding of the Slovak economic environment. Our main goal is to ensure that our energy management solutions are widely applied and, with the help of our partners, contribute to increasing the efficiency of Slovak companies.

The National Hydrogen Association of Slovakia (NVAS) was established as an initiative of individuals and legal entities to support the research, implementation, and use of hydrogen technologies and fuel cells. NVAS closely collaborates with ministries, particularly the Ministry of Economy, to help its members and partners secure an appropriate legislative and regulatory environment for building the hydrogen value chain in Slovakia. Its leadership participated in the preparation of the National Hydrogen Strategy and the Action Plan for the implementation of the Hydrogen Strategy objectives. NVAS is a member of: Hydrogen Europe, European Clean Hydrogen Alliance, Asia–Pacific Hydrogen Association. NVAS also cooperates with Clean Hydrogen Partnership, which allows public–private partnerships at EU level in industrial research. For its members, NVAS offers opportunities for visibility, fostering new collaborations, participation in professional workshops and conferences, feedback on legislation and funding schemes, up–to–date information from the hydrogen sector, and project financing opportunities.

COOPERATION PROFILE

As an association, we strive to continuously improve our services for members and expand our membership base to ensure that our input and efforts have maximum impact and reflect the real needs of the market. We organize professional workshops and conferences, offer networking opportunities, and facilitate partnerships and consortiums. We engage in legislative reviews, participate in hydrogen project consortiums, and develop expert studies.

Spoločnosť norriv je lídrom v oblasti holografických technológií a inovatívnych riešení v oblasti vizuálnej komunikácie. Špecializuje sa na vývoj a výrobu Hologram Boxov, ktoré prinášajú jedinečný zážitok prostredníctvom 3D holografických projekcií. Ich produkty nachádzajú uplatnenie v rôznych odvetviach, vrátane marketingu, vzdelávania, zábavy a priemyselných aplikácií. Spoločnosť norriv sa zameriava na výskum a vývoj (R&D), aby neustále posúvala hranice možného v holografických technológiách. Ich AI Holografický Avatar predstavuje spojenie umelej inteligencie a holografie, čo umožňuje interaktívnu komunikáciu v reálnom čase. Norriv tiež poskytuje riešenia na mieru, vrátane vytvárania 3D animácií a interaktívnych 3D modelov podľa špecifických požiadaviek klientov. Spoločnosť kladie veľký dôraz na kvalitu a inovácie, čo potvrdzujú aj ich úspešné projekty a spokojní klienti po celom svete. Norriv sa neustále snaží prinášať nové a efektívne riešenia, ktoré zlepšujú vizuálnu prezentáciu a komunikáciu. Ich tím odborníkov je pripravený čeliť výzvam a vytvárať hodnotu pre svojich klientov prostredníctvom technologických inovácií.

COOPERATION PROFILE

Spoločnosť Norriv hľadá partnerov v rôznych odvetviach, aby spoločne preskúmali a využili inovatívne možnosti, ktoré ponúka ich AI poháňaná Hologram Box. Táto technológia umožňuje vytvárať realistické holografické projekcie, ktoré dokážu zaujať a zapôsobiť na zákazníkov v reálnom čase. Oblasti partnerstva: AI Holografický Avatar: Personalizujte interakcie pomocou AI avatara, ktorý prináša futuristický dotyk do zákazníckych služieb. Podujatia a EXPOS: Urobte prezentácie nezabudnuteľnými pomocou dynamických holografických vizuálov, ktoré zanechajú trvalý dojem. Maloobchod: Zobrazte produkty v pútavej 3D animácii, čím zvýšite ich viditeľnosť a zaujmete zákazníkov. Zdravotníctvo a Vzdelávanie: Predstavte vzdelávací obsah v atraktívnom a interaktívnom formáte, ktorý zvyšuje zapojenie a porozumenie. Hotelierstvo: Privítajte a komunikujte s hosťami pomocou virtuálneho holografického recepčného, čím zlepšíte zákaznícku skúsenosť. S norriv Hologram Box môžete priniesť inováciu a kreativitu do každej z týchto oblastí, pričom každá holografická projekcia rozpráva príbeh vašej značky alebo produktu. Partnerstvom s Norriv môžete vytvoriť nezabudnuteľné a pôsobivé zážitky pre svojich zákazníkov.

COMPANY PROFILE

Powerex, thanks to its control platform built on its own artificial intelligence, enables to address typical problems and challenges of the energy market such as saving growing energy costs and optimizing energy behavior in the context of changing energy market conditions. Our solution enables customers to realize the "behind-the-meter" potential in the market, where customers using Powerex solutions can actively participate in energy markets and not only save energy costs but generate new, previously unrealized, energy revenues. The Powerex platform predictively and in real-time manages customers' energy flexibility resources such as battery systems, cogeneration units, or energy intensive technologies, among others. We are at home in the energy markets of Slovakia and the Czech Republic, where we help many commercial customers. Together with our partners, we can also provide both design and installation of complex energy units (e.g. PV plants, battery systems, CHP plants, etc.), which we then intelligently manage to minimize the payback period of the investment.

COOPERATION PROFILE

cooperation partners across our supply chain, including suppliers, business partners, and customers. This is a unique opportunity to collaborate, explore synergies, and build lasting partnerships that drive mutual growth and success in energy sector.

In our company, we specialize in the production and sales of electric actuators, assembly of actuators with industrial valves, solenoid valves, pneumatic elements and gas pressure regulators. The tradition of manufacturing solenoid valves and actuators in Slovakia dates back to the 1960s. Our products are designed by our design engineers and manufactured in our own state-of-the-art facilities using the latest technology. In addition, we also have our own foundry where we carry out aluminium die-casting. The components we use in REGADA products come from European Union countries.

COOPERATION PROFILE

As we are manufacturer of many type of products our main products are electric actuators. We are looking for design companies, project implementers and suppliers for projects in energy segment, where control of flow of water or steam is needed. We have also actuators which are suitable for power plants and nuclear power plants. At the moment we have thousands of electric actuators around the world. We would be glad to find someone who will want to cooperate with us in their projects.

ORGANISATION DETAILS

COMPANY PROFILE

R-SYS s.r.o. (Ltd.) was founded in 1997 by a group of experts with extensive experience in Command & Control systems and radar technology. From the outset, the company's structure and business strategy have been focused on keeping up with industry trends and responding flexibly to market demands by delivering competitive software and hardware solutions, as well as system integration services in the ATC/ATM, C2, and UTM domains. R-SYS is a private Slovak company wholly owned by ERA a.s. Today, R-SYS represents a medium-sized, project- and product-oriented IT company with offices in four locations across Slovakia, employing 50 highly skilled IT specialists. Our production has been certified to the quality management system EN ISO 9001:2015 and the environmental management system EN ISO 14001:2015 since 2013. For developing and maintaining software systems, we employ a unified methodology covering all standard software development processes in compliance with ISO/IEC 12207. Additionally, we apply the software safety assurance standard ED-109A at AL5 level for software deployment in accordance with ED-153 SWAL Level 4. Company domains: • ATC/ATM Systems: Designed for the control and management of air traffic at airports and/or small to medium Area Control Centres in compliance with ICAO and EUROCONTROL standards. • UTM/cUAS Systems and Integration APIs: Comprehensive solutions for managing unmanned systems and countering their threats, including integration APIs. • Operational Data Recording System: A system for recording, archiving, and replaying voice and video communications and LAN/WAN data, designed for mission-critical applications used by units such as ATC centers, police forces, fire brigades, and more. • AIS/AIM/UTM Software Package: A solution for processing and distributing aeronautical information, including a module for pre-flight briefing with mobile platform support, UAV operations planning, and modules for NOF and ARO, SAF, FIC, and the SPI system for Air Navigation Service Providers (ANSP).

Schaeffler Kysuce je súčasťou koncernu Schaeffler, zameriavajúc sa na výrobu presných komponentov pre automobilový a strojársky priemysel. Závod v Kysuciach patrí medzi hlavné výrobné centrá v strednej Európe, s dôrazom na ložiská a systémy prenosu pohybu. Spoločnosť investuje do kvality, technologického pokroku a udržateľnosti svojich produktov. Schaeffler na Kysuciach disponuje moderným výskumným a vývojovým centrom, ktoré je kľúčovým pilierom inovácie v rámci celej spoločnosti. Špecializuje sa na vývoj nových technológií a produktov pre oblasť elektromobility a podvozkové systémy s vysokým stupňom autonómneho riadenia. Vďaka vysoko kvalifikovaným odborníkom a pokročilým laboratóriám prispieva k neustálemu zlepšovaniu a optimalizácii výrobných procesov. Výskumné a vývojové centrum zároveň podporuje spoluprácu s univerzitami a výskumnými inštitúciami, čím zabezpečuje prístup k najnovším poznatkom a inováciám. Schaeffler Kysuce is part of the Schaeffler Group and focuses on the production of precision components for the automotive and mechanical engineering industries. The Kysuce plant is one of the most important production centres in Central Europe, focusing on bearings and motion transmission systems. The company invests in the quality, technological progress and sustainability of its products. Schaeffler has a modern research and development centre in Kysuce, which is an important pillar of innovation throughout the company. It specialises in the development of new technologies and products for electromobility and chassis systems with a high degree of autonomous driving. With highly qualified experts and advanced laboratories, it contributes to the continuous improvement and optimisation of production processes. At the same time, the R&D centre promotes collaboration with universities and research institutes, ensuring access to the latest knowledge and innovations.

STUBA Green Team is the only team in Slovakia that successfully represents our country and university in the Formula Student Electric competition. It has been operating since 2009 and currently consists of 40 members, students mainly from the Slovak University of Technology. We regularly take part in races in Europe and various other events related to motorsport, technologies and engineering. During the existence of the team, we have so far managed to develop, design and build 9 electrical formulas. This year we aim to create another new monopost.

COOPERATION PROFILE

We are a student team working on a complex project. Just as our members are designers, programmers, mechatronics engineers or computer scientists, the scope of our partners is wide. In our work we are looking for technical support to solve various problems, material support, technological support, team management support or financial support. Our goal is for each member to become an expert in his or her area of interest and to use the knowledge gained to design a race car. Each year we build a new monopost with many improvements over the last season to remain competitive in the competition of the world's technical universities.

ORGANISATION DETAILS

COMPANY PROFILE

The company specializes in the production and sale of scalable battery energy storage systems (BESS), utilizing high-quality liquid-cooled battery modules from leading global manufacturers like CATL. The design, engineering, and assembly of our battery storage solutions take place in a facility with extensive expertise in the energy sector. A key element of our product quality is the adherence to strict production and assembly standards. Our battery storage systems integrate liquid-cooled battery cells from CATL, known for their reliability, with a failure rate as low as 1 in 1,000,000,000. This exceptional quality is achieved through over 6,800 quality control points and more than 700 tests conducted on each cell. By combining top-notch components, high-level engineering, and precise dimensioning, we deliver advanced and intelligent solutions that provide long-term benefits to our clients. The manufacturing and assembly processes at our facility in Žilina comply with the highest standards and ISO certifications, ensuring the delivery of high-quality solutions to meet diverse energy needs.

COOPERATION PROFILE

We are seeking partners active in the energy sector who are interested in technologically advanced and reliable battery storage solutions. Ideal candidates include: Representatives of distribution companies and energy firms looking for efficient energy storage solutions. Renewable energy developers (solar and wind projects) who require scalable storage to optimize production and distribution. Engineering and EPC companies (Engineering, Procurement, Construction) collaborating on large-scale energy projects and looking to expand offerings with battery energy storage systems. Industry representatives from energy-intensive sectors that would benefit from intelligent storage systems. Our goal is to establish partnerships with those who value the high quality, reliability, and long-term sustainability of our battery storage products.

ORGANISATION DETAILS

COMPANY PROFILE

Wenerate is an energy management and monitoring system supported by AI, which helps optimize industrial processes by tracking and analyzing production data. We cut energy costs, increase machine uptime, help avoid unexpected breakdowns, automate external (ESG, carbon) and internal (budget) reporting, and continuously support the production team to achieve efficiency targets. To do this, we provide monthly subscription-based software that can be complemented with data collection hardware. In Hungary, we operate our system in 40 factories, such as Saint-Gobain (2 sites), BMW (6 sites), ZEISS (2 sites), Tenneco (1 site), Shinwa (1 site), M-Plus Group (1 site), etc. In Slovakia, we have one reference client ORAC Slovakia in Lipany.

COOPERATION PROFILE

Project 1) Distributors and partners We are looking for partners to help us expand the Wenerate energy management platform in the Slovak market. We can provide support and budget for marketing and sales from Hungary, which the local Slovak partner should do for Slovak customers. Project 2) Investors We are looking for strategic and financial investors to help us build the Slovak market in a joint-venture structure. Project 3) Sites for pilot R&D We are looking for companies with high energy use who would like to join us for a joint R&D project for a period of 6–9 months, consisting of a full energy management system implementation and related consulting services without the need to commit to us for a long term (3–5 years). Of course, if the pilot is successful we would like to provide the benefits of our software on a long-term basis.
