- 9 Well-developed infrastructure
- 10 Strong local production capacities in need of plastic components

Chemical & Plastics Industry in Slovakia – Summary

Unlike in some other countries, the output of the Slovak chemical industry does not consist of one product or a group of few products, but includes a diversified portfolio of hundreds of different products, ranging from petrochemicals, agrochemicals, and primary organic/ inorganic chemicals, to rubber and plastic products.

Chemical industry has traditionally been one of the largest sectors of Slovak economy. In 2022, revenues generated by all companies in this sector amounted to EUR 13,34 billion. At the same time Slovak chemical industry equaled output of 12.19% (EUR 13,66 billion) from the total industrial production (EUR 112 billion). The sector employs over 40,000 people in approximately 280 companies.

The Slovnaft group represented almost the whole turnover of the coke and petroleum production in Slovakia, which is the biggest revenue generating sub-sector of the chemical industry.

Skilled & Cost-Effective Labour Force

Slovakia is praised as one of the most productive countries in Europe. Combined with cost-effectiveness and high education level, Slovak labour force excels in the three areas that often concern investors – productivity, qualification and labour costs.

More than 1,900 companies and 9,000 students joined the dual education in academic year 2023/2024

DUAL EDUCATION

The Slovak Government has fully implemented a new dual education framework facilitating combination of theoretical education in schools and practical training in companies. The companies joining the new scheme have the advantage of not only benefiting from a prepared and qualified labor force, but also from the possibility to utilize a related tax relief and other financial benefits.
